

Ohio Valley Surgical Hospital was established in 2009 and provides an award-winning care experience for elective surgical procedures and medical care. Located in the heart of downtown Springfield, OVSH offers in-patient and out-patient surgical procedures, as well as affiliated services including imaging, 3D mammography, physical and hand therapy, colonoscopy screening, and comprehensive orthopedic programming. Areas of distinction include being a Breast Center of Excellence and a Joint Replacement Center of Excellence. Awarded the top CMS 5-Star rating for Patient Experience, Ohio Valley provides exceptional care to patients, in an environment of personalized service. OVSH has partnered with Dayton-based Premier Health and Columbus-based OhioHealth as part of an ongoing commitment to expand access to care and keep care local in Clark County.

MISSION: To ELEVATE THE STANDARD of healthcare in OUR community

Ohio Valley's MISSION is achieved by identifying existing, and future, health needs in the community, and by addressing those needs through new or existing health initiatives which include education, prevention and screening programs.

Communities Served

The primary service areas identified for Ohio Valley Surgical Hospital include Clark, Champaign and surrounding counties in Ohio.

Prioritization of the Community Health Assessment (CHA)

Criteria for Prioritizing

Ohio Valley Surgical Hospital aims to align its priorities with the top community health needs identified in the Community Health Assessment (CHA) while providing services that aid in addressing the social determinants of health, structural and systemic barriers that impact the surrounding community.

Process for Strategy Development

The Clark County Community Health Assessment (CHA) is a result of collaborative community participation through a steering committee which includes Ohio Valley's Market & Brand Strategy Director, Kristin Davis, multiple task force and coalition partners, as well as individual community members.

From the data collected during the Community Health Assessment (CHA), the Steering Committee identified four health priorities. These health priorities are the foundation for the Ohio Valley CHIP.

Priorities identified in the CHA include:

- Maternal, Infant & Sexual Health
- Chronic Disease
- Mental Health

- Housing & Neighborhood Stability

The Community Health Assessment (CHA) is a long process which guides the community through a collaborative, creative process and leads to a shared community vision and common values. The Ohio Valley CHIP provides focus, purpose, and direction so we can collectively achieve a shared vision for the future.

Description of Ohio Valley Strategies Addressing Top Health Conditions Identified in the CHA

Maternal, Infant & Sexual Health – Currently, Ohio Valley Surgical Hospital does not offer any community benefit programs that address maternal, infant and sexual health for the public. However, the Premier Health hospital system and OhioHealth hospital system offer a robust array of services for patients.

Chronic Disease - Ohio Valley Surgical Hospital provides the community with 3D Mammograms, Simple Access Colonoscopies and Low Dose CT Screenings for Lung Cancer. Approximately four out of 10 Ohioans will be diagnosed with cancer at some point during their lifetime. Cancer is the second leading cause of death in Ohio, accounting for nearly one in five deaths. This report provides an overview of cancer in Clark County, Ohio, including data on cancer incidence (new cases) and mortality (deaths), and Ohio and U.S. comparisons, trends, early detection, and risk factors.

3D Mammograms

Sponsor	Ohio Valley Imaging Center
Metrics	<ul style="list-style-type: none"> 70.3% of Clark County women 50-74 years old reported they had a mammogram in the past two years, compared with 77.9% in Ohio and 78.6% in the United States. OV Imaging Center provided 5128 3D Screening Mammograms and 1483 3D Diagnostic Mammograms in 2022 and 4707 3D Screening Mammograms and 1229 3D Diagnostic Mammograms YTD in 2023.
Budget	N/A
Intervention Goal	Mammograms can reveal nearly 90% of breast cancers as early as two years before a lump can be felt, giving you the best chance for successful treatment. Screenings should be scheduled every year beginning at age 40. Our goal is to continue to increase on numbers each year.
Description	<ul style="list-style-type: none"> In 2016-2020, the cancer incidence rate for all sites/types combined in Clark County was 494.9 per 100,000 population, compared with the Ohio rate of 465.3 per 100,000 and the U.S. rate of 438.7 per 100,000. The 2016-2020 cancer mortality rate in Clark County was 179.9 per 100,000 population, compared with the Ohio rate of 166.1 per 100,000 and the U.S. rate of 149.4 per 100,000. Clark County had higher proportions of early-stage breast cancer in 2016-2020, compared with Ohio. Ohio Valley Breast Center was the first healthcare facility in the region to offer this state-of-the-art technology and is the only facility in Springfield/Clark County with a team of Breast Care Nurse Coordinators. Our Nurse Coordinators provide personal guidance and resources to patients and their families, helping them move seamlessly through a stressful and often complex healthcare process. Working in partnership with our team of board certified, sub-specialty trained radiologists, the Ohio Valley Breast Center provides patients with the most accurate diagnosis and more timely treatment
Partners	Local primary care physicians, APP's and specialty surgeons.

Low Dose CT Screenings for Lung Cancer

Sponsor	Ohio Valley Imaging Center
Metrics	<ul style="list-style-type: none"> Lung and bronchus cancer was the leading cause of cancer incidence in Clark County in 2016-2020, accounting for 17.5% of cancer cases and 28.0% of cancer deaths. OV Imaging Center provided 214 CT Lung screenings in 2022 and 293 YTD in 2023.
Budget	N/A
Intervention Goal	CT Lung Screening for high-risk people can reduce deaths from lung cancer by 20%. Our goal is to continue to increase screenings each year.

Description	<ul style="list-style-type: none"> In 2016-2020, the cancer incidence rate for all sites/types combined in Clark County was 494.9 per 100,000 population, compared with the Ohio rate of 465.3 per 100,000 and the U.S. rate of 438.7 per 100,000. The 2016-2020 cancer mortality rate in Clark County was 179.9 per 100,000 population, compared with the Ohio rate of 166.1 per 100,000 and the U.S. rate of 149.4 per 100,000. A low-dose chest CT scan is recommended for current or former smokers between ages 50-80. Smokers must have 20+ years and former smokers must have quit within the last 15 years. The Ohio Valley Imaging Center uses low-dose CT (LDCT) screening to diagnose early lung cancer, before a person develops symptoms. Lung cancer is the #1 cancer diagnosed in Ohio and the #1 cause of cancer deaths in Ohio. Lung cancer screening may save lives by finding cancer earlier when it may be treated more successfully. LDCT screening is for people at high risk for lung cancer and is the only recommended screening test for the disease
Partners	Local primary care physicians, APP's and specialty surgeons.

Simple Access Colonoscopies

Sponsor	Ohio Valley Surgical Hospital
Metrics	<ul style="list-style-type: none"> 72.0% of Clark County adults 50-75 years old met colon and rectum cancer screening guidelines, compared with 70.2% in Ohio and 70.8% in the United States. Ohio Valley Surgical Hospital provided 1097 screening colonoscopies in 2022 and 1200 YTD in 2023.
Budget	N/A
Intervention Goal	Our goal is to continue to work with local healthcare providers and the community to educate them on the benefits of screening colonoscopies.
Description	<ul style="list-style-type: none"> In response to the recommendation of local primary care physicians, Ohio Valley initiated a process to expedite screening colonoscopies to qualified patients. Our Endoscopy Coordinator assists patients with scheduling procedures and educating patients about bowel preparation. Colorectal cancer is one of the leading causes of cancer death in Clark County; colonoscopies are the most effective means of prevention, diagnosis and screening.
Partners	Local primary care physicians, APP's and specialty surgeons.

Housing and Neighborhood Stability - Currently, Ohio Valley Surgical Hospital does not offer any community benefit programs that address housing and neighborhood stability for the public. However, local non-profits as well as the City of Springfield and Clark County provide these services.
